

PRAVEEN R

Unity Game Developer • C# Programmer

Sholinghur, Tamil Nadu, India | +91 9952023466 | praveenraja4102004@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Passionate Unity Game Developer specializing in gameplay programming, responsive systems design, and mechanics prototyping with Unity and C#. Experienced in designing, developing, and publishing game titles independently, including multiplayer systems, enemy AI algorithms, and custom level creation tools. Strong grasp of OOP, state machines, and gameplay architecture, with a focus on delivering optimized, responsive, and polished player experiences.

PROJECTS

Doodle Army – Multiplayer Action Shooter ([Itch.io](#))

A fast-paced 2D multiplayer shooter inspired by Doodle Army 2. Recreated core combat mechanics and movement systems, implemented seamless real-time multiplayer networking using Mirror in Unity, and designed a custom tile map system and bespoke level editor tools for efficient level configuration. Programmed player controls, weapon shooting logic, health systems, and optimized mobile touch controls for performance.

Sci-Fi Shooter – First Person Shooter ([Itch.io](#))

A modular FPS featuring multi-weapon switching, a Scriptable Object-based weapon architecture, and dynamic enemy spawning. Built to focus on scalable combat systems, responsive gunplay, and flexible enemy encounter design. Implemented raycast-based shooting, gun recoil, muzzle flash effects, and a radial weapon-wheel UI.

2D Platformer (*Under Development*)

A level-based 2D side-scrolling platformer. Implementing a responsive 2D character controller with custom physics, raycast grounding, and double-jump mechanics. Programming smart Enemy AI behavior patterns (patrol, navigation, and combat) using Finite State Machines, and designing modular level layouts and game progression states.

TECHNICAL SKILLS

- Game Engine & Tools:** Unity (2D & 3D), Visual Studio, Git & GitHub for version control, Mirror (Multiplayer Networking), Level Editor Tools, Tile Map Systems.
- Scripting:** C#, Unity Input System (Old & New), State Machines, GOAP, OOP, and common design patterns, Scriptable Objects.
- UI & UX:** Unity UI (Canvas, Layout Groups, Buttons, Sliders), basic UI animation and responsive layouts, Mobile UI/UX optimization.
- Animation & Camera:** Animator Controller, Animation Rigging, Procedural Animation, Cinemachine.
- Computer Science & AI:** Artificial Intelligence & Machine Learning (AI/ML), Data Structures & Algorithms (DSA), Design & Analysis of Algorithms.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

K. Ramakrishnan College of Engineering

2022 – 2026

CGPA: 8.2 / 10
